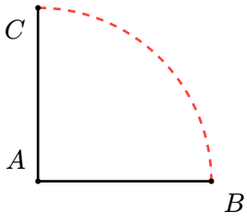
Regression tests

Part 1 — numeric assertions

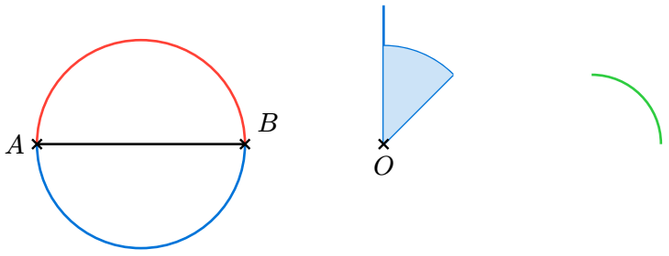
All numeric assertions passed.

Part 2 — visual cases

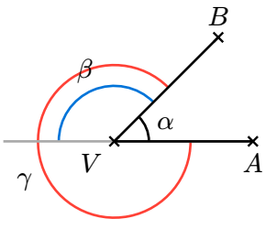
Issue 4 repro: arc around A from B to C (red quarter circle joining B and C)



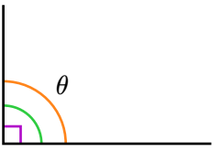
Semicircles: red above AB, blue below; sector; compass arc; arc-r



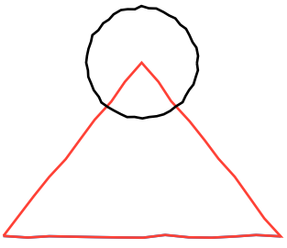
Angle types: interior α, supplementary β (flat side), reflex γ



Global angle style via ctz-style (orange, radius 0.9) + right-angle marks



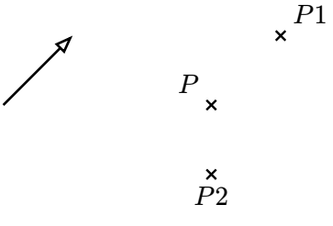
Sketchy named objects (used to crash): line d, polygon T, circle c

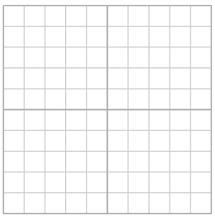


Labels: auto placement off the line (M), 6-char name (Omega1), greek (alpha)

Point style overrides on ctz-draw (red dots, big green squares)

Translation by point pair (fixed) and by raw vector





Grid with step 0.1 sub-grid: last line at 1.0 present on all four edges
